

RASHEED MALIYEKKAL

Full Stack + Ai Engineer

+919207421202 • rasheedmm1000@gmail.com • [Portfolio](#) • [Linkedin](#) • Kochi, India

Summary

I am a dedicated and innovative SaaS Full Stack + AI Developer with experience in building AI powered platforms from the ground up. My expertise includes full-stack application development using a variety of technologies. I am passionate about creating efficient and scalable solutions that enhance user experience and streamline processes. I also enjoy mentoring and leading teams to foster technical growth and collaboration

Experience

Geekflare AI

Full Stack AI Developer

09/2025 - 11/2025

Led end-to-end development of full-stack, scalable RAG and enterprise AI platforms.

- **Built enterprise RAG systems** using **LlamaIndex + vector databases**, improving retrieval accuracy and response relevance for private datasets
- **Designed end-to-end RAG pipelines** (ingestion, chunking, embeddings, re-ranking), reducing hallucinations and improving LLM answer quality
- **Implemented LLM-powered applications** using **OPEN AI, Claude, Gemini**, enabling intelligent search, summarization, and decision support
- **Developed AI agents and automation workflows** for enterprise use cases, reducing manual effort and operational latency
- **Optimized embedding and retrieval strategies** with hybrid search and context tuning to achieve faster inference and higher precision
- **Integrated LLM fine-tuning and prompt engineering** techniques to improve task-specific performance and consistency
- **Deployed scalable GenAI services** with monitoring and optimization, supporting high-traffic, production-grade AI workloads

Self-Employed

Freelance & Full Stack SaaS Developer

08/2024 - 8/2025

Freelance SaaS Dev | Led team building full-stack, scalable SaaS apps.

- **Led end-to-end development** of AI-powered SaaS platforms like **RexaHire, MakeMyFlyer, and Bioly**, serving 10K+ users
- **Architected scalable, production-ready applications** using **Next.js, Node.js, Firebase, MongoDB, and AWS** with 99.9% uptime
- **Built reusable design systems** and modular frontend components for consistent UX across platforms
- **Integrated and deployed LLM based agents** using **OpenAI GPT, Claude, Hugging Face, and ElevenLabs** for voice & text workflows
- **Implemented CI/CD pipelines** using **GitHub Actions, AWS Lambda, and Firebase Hosting** for rapid and reliable deployments
- **Automated workflows** using **n8n and Zapier**, reducing operational overhead and manual effort by over 80%
- **Enabled real-time features** with **WebSockets** and **serverless APIs**, improving responsiveness and interactivity
- **Optimized backend performance** with lazy loading, caching, and asynchronous processing for high throughput systems
- **Led Agile sprints** with cross-functional teams and managed releases through **Git, Jira**, and automated testing pipelines

Google Developer Student Clubs, TKMCE

Tech Lead

09/2022 - 08/2023

University student organization focused on technology and student development

- Organized large-scale tech events and hackathons with 200+ participants
- Mentored teams in mobile app development, web technologies, and cloud computing
- Conducted hands-on workshops promoting Firebase, Google Cloud Platform, and modern development tools

Education

TKM COLLEGE OF ENGINEERING

Kollam

B.Tech. in Computer Science and Engineering

08/2021 - 07/2024

MADIN POLYTECHNIC COLLEGE

Malappuram

DIPLOMA in Computer Science and Engineering

07/2018 - 08/2021

Skills

Next.js, React.js, Python, Node.js, TypeScript, AWS, Serverless Architecture, Docker, MongoDB, PostgreSQL, Redis, OpenAI API, LLMs (Claude, Open Ai, Vertex AI), RAG Systems (LlamaIndex, Langchain, Vector Databases, Qdrant, Pinecone Embeddings), AI Agents & Prompt Engineering, REST APIs & Production-Grade SaaS Architecture, Docker, GIT, Cursor, Antigravity

Projects

Chatlo.io

[Link](#)

- Built a **multi-tenant AI chatbot platform** using **RAG architecture** with secure document ingestion, embeddings, and vector search
- Implemented **agentic workflows** with **OpenAI, Claudel** for automated support, lead qualification, and internal AI tools
- Developed **real-time chat infrastructure** using **WebSockets**, usage analytics, and cost-optimized LLM orchestration

Notes.Chatlo.io

[Link](#)

- Developed an AI-powered note-taking app and web with LLM-based summarization, rewriting, and content generation
- Implemented **semantic search over notes** using embeddings and context-aware retrieval
- Built a fast, responsive UI using **Next.js, React Native and Tailwind CSS** with secure authentication

Make My Flyer

[Link](#)

- **Launched a profitable AI SaaS** that auto-generates marketing flyers, visuals, and videos from product data
- **Boosted content creation efficiency by 3×** through automation of design and media workflows
- **Enabled text-to-flyer generation**, allowing users to create marketing materials via natural language input
- **Integrated Veo 3 for cinematic video creation**, enhancing visual appeal and engagement

Dietly, AI Nutrition & Calorie Tracker

[Link](#)

- A **cross-platform AI health app** that recognizes food items and tracks calories using camera input
- **Integrated OpenAI and Google Vision APIs** for real-time food detection with over 90% accuracy
- **Achieved 40% higher retention rate** by offering personalized, goal-driven meal suggestions
- **Enabled calorie tracking and nutrition breakdown** to support weight loss and fitness goals

Bioly.link

[Link](#)

- **AI-powered link-in-bio platform** that automates user workflows and content management
- **Reduced manual tasks by 80%** through personalized automation and smart link management
- **Integrated Google Calendar and Meet APIs** for one-click scheduling and virtual meetings
- **Improved user productivity and conversion rates** with seamless scheduling and messaging flows
- **Enabled dynamic bio pages** tailored to audience segments using AI-driven content generation
