

Rasheed Maliyekkal

rasheedmm1000@gmail.com | +919207421202
[Portfolio](#) [Linkedin](#)

Skills

Languages: TypeScript, Java, C, C++, Python, Dart, JavaScript, SQL

Technologies & Tools: React.js, Next.js, Flutter, AWS, GCP, Firebase, PostgreSQL, MongoDB, Android SDK, Agile methodologies, RESTful APIs, Node Js, Cursor, Claude, Generative Ai Models, Open Ai, Vertex Ai, Git, Github Actions, Unit Testing, CI CD, Serverless Architecture

Experience

Freelance & Indie SaaS Developer, Self-Employed | Apr 2022 – Present

- **Launched MakeMyFlyer.com**, a profitable AI design SaaS, enabling creators to generate flyers and faceless videos in seconds—reaching **1000+ monthly design generations** and cutting design time by **90%**.
- **Built Snapzy.in**, an AI-powered mobile case personalization platform with **500+ paid orders**, leveraging **LoRAs**, **avatar generation** and real-time product customization, increasing conversion rates by **35%**.
- **Developed Bioly.link**, a link-in-bio automation tool with CRM, analytics, and booking features—streamlining client workflows and reducing manual management by **80%**.
- Delivered high-performance OTT apps with **ExoPlayer**, **HLS**, and **AWS CDN**, improving streaming efficiency by **35%** and supporting 100k+ views/month.
- Built and deployed scalable, serverless backends using **Node.js**, **Firebase**, and **AWS Lambda**, maintaining **99.9% uptime** and reducing infrastructure costs by **30%**.
Integrated **Stripe**, **Razorpay**, and **Cashfree**, enabling flexible monetization with one-time payments and recurring subscriptions—boosting MRR (monthly recurring revenue).
- Automated business processes with **LLMs (GPT-4, Claude)** and **N8N**, accelerating development by **50%** and delivering smart AI features like chatbots, design generators, and workflows.
- Shipped multiple **cross-platform mobile apps** with **Flutter**, reducing development time by **40%** and gaining visibility via **Google Play Store** across e-commerce, AI, and productivity domains.

Key Technologies: Java, Flutter, Dart, Next.js, React, TypeScript, Node.js, PostgreSQL, Firebase, AWS, GCP, ExoPlayer, WebRTC, Stripe, Razorpay, LLMs, GPT-4, LoRA, GenAI, Serverless, Git,

Google Developer Student Clubs, TKMCE SEP 2022 - Aug 2023 *Tech Lead*

- Organized tech events and hackathons with 200+ participants, boosting community engagement by 40%.
- Mentored team members in mobile app development, web technologies, and cloud computing.
- Promoted **Firebase** and **Google Cloud** through workshops, inspiring students to adopt these tools.

Projects

Make My Flyer [LINK](#): Launched a profitable AI SaaS platform that enables users to instantly generate high-quality flyers, marketing visuals, and marketing videos from product data—eliminating the need for design skills.

- Increased user content creation efficiency by **3x** through automated AI design generation using **OpenAI** and **Gemini 2.5**
- Reduced video creation time by **70%** with **Runway ML** integration for faceless promotional content
- **Veo3** for ad video generation, incorporating audio and human elements to enhance product-to-visual transformation.

- Achieved over **1,000 design generations/month** with a fully responsive UI and optimized performance

Tech Stack: Next.js, TypeScript, React, Tailwind CSS, OpenAI, Gemini 2.5, Runway ML, Google Vertex AI

Dietly – AI Nutrition & Calorie Tracker [LINK](#): Developed a cross-platform AI health app that helps users identify food, track calories, and generate personalized meal plans using photo input

- Implemented photo-based food tracking using **OpenAI** and **Gemini models**, achieving **highly accurate calorie estimation** from images
- Delivered **smart AI meal planning** using ingredient-based scans and personalized nutritional insights
- Built a smooth **offline-first experience** using **Hive local database** and background syncing for uninterrupted access
- Enabled seamless food logging with editable **labels**, meal categories, and automatic suggestions
- Enhanced user experience with daily nutritional summaries, macro tracking, and goal-based recommendations — increasing daily user engagement by **30%**

Tech Stack: Flutter, Dart, Firebase, OpenAI, Vertex AI, TensorFlow Lite, Hive, Google ML Kit, Cloud Functions, FCM, RevenueCat

Bioly.link [LINK](#): Developed an AI-driven automation and link-in-bio platform, centralizing booking, payment, communication, and content management for creators and businesses.

- Reduced manual workflows by **80%** using personalized automation via **OpenAI** and **Gemini LLMs**
- Enabled seamless client scheduling and updates through integrations with **Google Calendar**, **Meet**, and **WhatsApp Cloud API**
- Facilitated **global payments** with integrated **Stripe**, **Razorpay**, and **Cashfree**, supporting both one-time and recurring models
- Delivered real-time performance insights with **WebSocket-based live updates**, and boosted backend performance with **Redis caching**
- Scaled to number of creators with a secure, **serverless architecture** hosted on **AWS** and **Firebase**

Tech Stack: Next.js, TypeScript, Node.js, Tailwind CSS, AWS, Firebase, MongoDB, Redis, Cloudflare, Google APIs, Twilio

Education

TKM COLLEGE OF ENGINEERING, Kollam: AUG 2021- JULY 2024 **B.TECH. in Computer Science and Engineering**

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Artificial Intelligence, Image Processing

MADIN POLYTECHNIC COLLEGE, Malappuram: JULY 2018- AUG 2021 **DIPLOMA in Computer Science and Engineering**

Relevant Coursework: Databases, Mobile Development, Python, Object Oriented Programming, Cloud Computing

Achievements

Hack at Arch, GEC Thrissur 2022 (National Level Hackathon): 2nd place, decentralized Blockchain real estate app

- Property ownership verification using Ethereum and IPFS.
- NFTs For Property Ownerships.

Latency, TKMCE IEDC 2022 (National Level Hackathon): Second Place/Farmers Community App

- Developed a native Android app using **Java** and **Kotlin** for local farmers to showcase bulk products for auction.
- Implemented a bidding system that allows buyers to place bids and track offers in real time.
